Dear Stephen

DER/02/18/00225: Proposed new dosing rig to serve the existing pumping station adjacent to 5 Poplar Row, Darley Abbey.

Please find below the latest DVMWHS response to the consultation concerning the above application. These comments will be taken to the World Heritage Site Conservation and Planning Panel for verification in July.

The proposed development lies within the Derwent Valley Mills World Heritage Site (DVMWHS). The Derwent Valley Mills were inscribed on the World Heritage List by UNESCO in 2001. The Derwent Valley Mills Partnership, on behalf of HM Government is pledged to conserve the unique and important cultural landscape of the Derwent Valley Mills World Heritage Site; to protect its outstanding universal value (OUV), to interpret and promote its assets; and to enhance its character, appearance and economic well-being in a sustainable manner.

The retrospective Statement of Outstanding Universal Value (SOUV) for the Derwent Valley Mills was adopted by the World Heritage Committee in 2010. The SOUV refers to the following UNESCO criteria, which the World Heritage Committee agreed were met at the time of inscription. They are:

- C(ii) That the site exhibits “an important interchange of human values, over a span of time or within a cultural area of the world, on developments in architecture or technology, monumental arts, town planning or landscape design”;
- C(iv) That the site is “an outstanding example of a type of building or architectural or technological ensemble or landscape, which illustrates a significant stage in human history”.

The SOUV records that these criteria were met for the following reasons:

- C(ii) The Derwent Valley saw the birth of the factory system, when new types of building were erected to house the new technology for spinning cotton developed by Richard Arkwright in the late 18th century.

C(iv) In the Derwent Valley for the first time there was large-scale industrial production in a hitherto rural landscape. The need to provide housing and other facilities for workers and managers resulted in the creation of the first modern industrial settlements.

A Management Plan for the World Heritage Site was created in 2002, and updated in 2014. It has as the first of its nine aims to: “protect, conserve and enhance the Outstanding Universal Value of the DVMWHS.” In accordance with this aim, and with reference to Section 12.1 of the Management Plan, I have consulted with Derbyshire County Council’s Conservation, Heritage and Design Service (which advises the World Heritage Site Partnership in planning matters), and have received the following advice:

Advice on the same planning application was made on March 18, 2018 in which the significance and sensitivities of the site were highlighted. Whilst the need for the tank was accepted in principle there was a concern that other design measures to help mitigate its visual impact had not been fully considered in the Heritage Impact Statement (HIS). This is in context of the proposed development being adjacent to and potentially visible from significant attributes, such as the former mill-workers cottages, within the WHS.

Having reviewed the information submitted with the planning application, it does not appear that these previous comments have been addressed in the HIS. Therefore it is considered that the previous comments remain relevant and should be addressed to ensure that the proposed development is of a suitably high-quality design, as set out under P 2.5 of the DVMWHS Management Plan, in order to minimise any potential adverse impacts on its OUV.

Thank you for this opportunity to comment on the application.

Yours sincerely
