22nd January 2019

Dear Laura

AVA/2018/1228: Listed building consent for erection of an oak framed rear garden room at 68 The Fleet, Belper.

Please find below my response to the consultation concerning the above application. These comments will be taken to the World Heritage Site Conservation and Planning Panel for verification later this month.

The site lies within the Derwent Valley Mills World Heritage Site (DVMWHS) Buffer Zone. The Derwent Valley Mills were inscribed on the World Heritage List by UNESCO in 2001. The Derwent Valley Mills Partnership, on behalf of HM Government, is pledged to conserve the unique and important cultural landscape of the Derwent Valley Mills World Heritage Site; to protect its outstanding universal value (OUV), to interpret and promote its assets; and to enhance its character, appearance and economic well-being in a sustainable manner.

The retrospective Statement of Outstanding Universal Value (SOUV) for the Derwent Valley Mills was adopted by the World Heritage Committee in 2010. The SOUV refers to the following UNESCO criteria, which the World Heritage Committee agreed were met at the time of inscription. They are:

- C(ii) That the site exhibits “an important interchange of human values, over a span of time or within a cultural area of the world, on developments in architecture or technology, monumental arts, town planning or landscape design”;
- C(iv) That the site is “an outstanding example of a type of building or architectural or technological ensemble or landscape, which illustrates a significant stage in human history”.

The SOUV records that these criteria were met for the following reasons:

- C(ii) The Derwent Valley saw the birth of the factory system, when new types of building were erected to house the new technology for spinning cotton developed by Richard Arkwright in the late 18th century.
- C(iv) In the Derwent Valley for the first time there was large-scale industrial production in a hitherto rural landscape. The need to provide housing and other facilities for workers and managers resulted in the creation of the first modern industrial settlements.

A Management Plan for the World Heritage Site was created in 2002, and updated in 2014. It has as the first of its nine aims to: “protect, conserve and enhance the Outstanding Universal Value of the DVMWHS.” In accordance with this aim, and with reference to Section 12.1 of the Management Plan, I have consulted with Derbyshire County Council’s Conservation, Heritage and Design Service (which advises the World Heritage Site Partnership in planning matters), and have received the following advice:

This grade II property is located within the Buffer Zone of the Derwent Valley World Heritage Site. The proposed conservatory would be located to the rear of the property and would be related to the reasonably large garden. It would not be visible from the public realm, or long views across the World Heritage Site from the opposite side of the river valley.

The proposed extension has been sensitively designed to a good standard. The garden room would be both subservient to the host building and contrasting in materials to have an honest, modern expression. The physical and visual impact on the historic fabric has been minimised by the use of a glazed linking device using high quality materials, appropriate to its high value heritage context.

In conclusion, it is considered that there would be no adverse impact to the setting of the Derwent Valley Mills World Heritage Site and hence no harm to its Outstanding Universal Value.

I hope these comments can be considered when a decision is made concerning this development.

Yours sincerely
