Dear Sarah

AVA/2018/1168: Retrospective - erection of livestock building, resurfacing of agricultural track, reprofiling of land / bank and creation of hardstanding on land south of Morley Hill Farm, Over Lane, Belper.

Please find below my response to the consultation concerning the above application. These comments will be taken to the World Heritage Site Conservation and Planning Panel for verification later this month.

The site lies near to, though not within the Buffer Zone of the Derwent Valley Mills World Heritage Site. The Derwent Valley Mills were inscribed on the World Heritage List by UNESCO in 2001. The Derwent Valley Mills Partnership, on behalf of HM Government, is pledged to conserve the unique and important cultural landscape of the Derwent Valley Mills World Heritage Site; to protect its outstanding universal value (OUV), to interpret and promote its assets; and to enhance its character, appearance and economic well-being in a sustainable manner.

The retrospective Statement of Outstanding Universal Value (SOUV) for the Derwent Valley Mills was adopted by the World Heritage Committee in 2010. The SOUV refers to the following UNESCO criteria, which the World Heritage Committee agreed were met at the time of inscription. They are:

- C(ii) That the site exhibits “an important interchange of human values, over a span of time or within a cultural area of the world, on developments in architecture or technology, monumental arts, town planning or landscape design”;
- C(iv) That the site is “an outstanding example of a type of building or architectural or technological ensemble or landscape, which illustrates a significant stage in human history”.

The SOUV records that these criteria were met for the following reasons:

- C(ii) The Derwent Valley saw the birth of the factory system, when new types of building were erected to house the new technology for spinning cotton developed by Richard Arkwright in the late 18th century.

C(iv) In the Derwent Valley for the first time there was large-scale industrial production in a hitherto rural landscape. The need to provide housing and other facilities for workers and managers resulted in the creation of the first modern industrial settlements.

A Management Plan for the World Heritage Site was created in 2002, and updated in 2014. It has as the first of its nine aims to: “protect, conserve and enhance the Outstanding Universal Value of the DVMWHS.” In accordance with this aim, and with reference to Section 12.1 of the Management Plan, I have consulted with Derbyshire County Council’s Conservation, Heritage and Design Service (which advises the World Heritage Site Partnership in planning matters), and have received the following advice:

Although the site occupies a high point within the locality, the livestock building is within an establish farmstead, with a number of other agricultural of the modern framed construction type and alongside one which already occupies the high ground.

While recessive materials and colours would normally have been recommended, had the application not been retrospective, it is considered that there would be little more loss of rural landscape setting than has already resulted from the development of the farmstead and the housing development of Whitemoor. Consequently, it is considered there would be no harm to the Outstanding Universal Value of the Derwent Valley Mills World Heritage Site and there is no objection to the proposed works.

I hope these comments can be considered when a decision is made concerning this development.

Yours sincerely
