Dear Sara

21/00335/LBA: Removal of existing railings and installation of replacement railings at Darley Abbey Mills.

Please find below my response to the consultation concerning the above application. These comments will be passed to the World Heritage Site Conservation and Planning Group for verification in April.

The application site lies within the Derwent Valley Mills World Heritage Site (DVMWHS), and is a key element of it. The Derwent Valley Mills were inscribed on the World Heritage List by UNESCO in 2001. The Derwent Valley Mills Partnership, on behalf of HM Government is pledged to conserve the unique and important cultural landscape of the Derwent Valley Mills World Heritage Site; to protect its outstanding universal value (OUV), to interpret and promote its assets; and to enhance its character, appearance and economic well-being in a sustainable manner.

The retrospective Statement of Outstanding Universal Value (SOUV) for the Derwent Valley Mills was adopted by the World Heritage Committee in 2010. The SOUV refers to the following UNESCO criteria, which the World Heritage Committee agreed were met at the time of inscription. They are:

- C(ii) That the site exhibits “an important interchange of human values, over a span of time or within a cultural area of the world, on developments in architecture or technology, monumental arts, town planning or landscape design”;
- C(iv) That the site is “an outstanding example of a type of building or architectural or technological ensemble or landscape, which illustrates a significant stage in human history”.

The SOUV records that these criteria were met for the following reasons:

- C(ii) The Derwent Valley saw the birth of the factory system, when new types of building were erected to house the new technology for spinning cotton developed by Richard Arkwright in the late 18th century.
- C(iv) In the Derwent Valley for the first time there was large-scale industrial production in a hitherto rural landscape. The need to provide housing and other facilities for workers and managers resulted in the creation of the first modern industrial settlements.

A Management Plan for the World Heritage Site was created in 2002, and updated in 2020. It has as the first of its nine aims to: “protect and conserve the Outstanding Universal Value of the DVMWHS to ensure its transmission to future generations.” In accordance with this aim, and with reference to the operational guidance in Section 20 of the Management Plan, I have consulted with Derbyshire County Council’s Conservation, Heritage and Design Service (which advises the World Heritage Site Partnership in planning matters), and have received the following advice:

The application is to replace some unsightly modern chain-link fencing with a painted (black), square section steel fence to a similar design of that over the toll bridge. It will be on the same alignment as the existing fencing and it does not appear to require any alteration to adjacent historic wall structures, etc. Therefore, this should be an improvement to the existing situation and so it should not have any adverse impacts on OUV.

Thank you for this opportunity to comment on the application.

Yours sincerely

A handwritten signature in black ink that reads "Adrian Farmer". The signature is written in a cursive style with a large initial 'A' and a long, sweeping underline.

Adrian Farmer

Heritage Co-ordinator,

Derwent Valley Mills World Heritage Site.
